[linkedin.com/in/ravi-jaisawal](https://www.linkedin.com/in/ravi-jaisawal)

Skills/Interests: Node.js, JavaScript, React.js, Angular 8, TypeScript, Express.js, Redux, Python, C#.net

StyledComponents: CSS, HTML, Git, GitLab, SQL, PostgreSQL, MongoDB, Redis, AWS, GCP

Experience

Software Development Engineer II

LEAD School Sep 2020 - Present

Responsibilities:

- Explore design implications and work towards an appropriate balance between functionality, performance, and maintainability.
- Lead by example, mentor and guide team members on everything from structured problem solving to development of best practices
- Be able to conceptualize and develop prototypes quickly using Strong Object-Oriented Designing/ Functional Programming skills
- Working with a cross-discipline team of Design, Product, Data Science, and Analytics team.
- Serve as module lead throughout the development lifecycle and assists in scoping, planning, estimation, conception, design, implementation, and testing, to documentation, delivery, and maintenance
- Explore design implications and work towards an appropriate balance between functionality, performance, and maintainability

Technologies :

- Back End: Node.js, JavaScript, Typescript, Express.js, REST API
- DB: Postgres, MongoDB, Redis
- Server: AWS, SQS , S3 Bucket

Senior Software Developer-Full Stack Quantiphi Jun 2019 - Sep 2020 (1 year 4 months)

Responsibilities:

- Designing system architecture for solving complex problems with a sound understanding of object oriented programming and Design Patterns.
- Deciding how the application will look, what the modules will be, and how they interact with each other.
- Deciding which framework, platform, or tech-stack can be used to create a solution.
- Working closely with business partners in defining requirements for system applications.
- Responsible for day to day supervision for a small team of associates

Technologies :

- Front End: React.js, Vue.js, Angular 6.x
- Back End: Node.js, Python
- DB: MongoDB
- Server: GCP

Software Developer-Full Stack Quantiphi

Jan 2019 - May 2019 (5 months)

Responsibility :

- Developing, enhancing, modifying and/or maintaining applications in the Global Markets environment.

- Design, code, test, debug and document programs as well as support activities for the corporate systems architecture.

Software Engineer

Fynd

Jun 2017 - Dec 2018 (1 year 7 months)

Responsibilities:

- Build scalable and loosely coupled services to extend the existing & new product.
- Build the bulletproof API integrations with the existing & new product.
- Evolve Infrastructure and added few functionalities for aws autoscaling using terraform.

Technologies :

- Front End: Angular 5.x, JavaScript, Typescript
- Back End: Node.js, Python, Django, Flask
- DB: MongoDB, Redis
- Server: AWS, Terraform, Ansible

Software Developer BookMyShow Jun 2015 - Jun 2017 (2 years 1 month)

Responsibilities:

- Analyze requirements, wireframes and capabilities of related systems to propose appropriate solutions and build prototypes when needed.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency and improve team performance.

Technologies :

- Back End: Node.js, C#.net, Asp.net
- DB: MS SQL, MongoDB, Redis

Technical Support Engineer Brainpower Technology Pvt. Ltd. Oct 2011 - Sep 2012 (1 year)

Worked as Technical Support Engineer with technologies like Oracle11G, Crystal Report 2008, ERP, POS, Ticketing System

Responsibilities:

- Implementation and support of F&B POS and ERP Central Inventory Module.
- Technical Skills: Oracle 11G, Seagate Crystal Reports 2008.

Education

Bhartiya Vidya Bhavans Sardar Patel Institute of Technology Munshi Nagar Andheri Mumbai

Bachelor of Engineering (BE), Information Technology
2012 - 2015

Skills

JavaScript • Node.js • angular 5 • Angular Material • React.js • React Material • Web Development • Software Development • Back-End Web Development • Python
