- **Version Control:** SVN, git, bitbucket

MANAGERIAL EXPERIENCE

2 years of interpersonal, conceptual, and technical skills which helped me explore and learn all aspects of Project Management. This role pushed me to my limits and enabled me to produce result driven outcomes for my project. I improvised the team environment by adapting **agile practices** for faster project delivery, boosting company **revenue by 40%**. Implemented team wide use of *Slack, Trello and google docs* to obtain better output.

PROFESSIONAL EXPERIENCE

Morph Digital Solutions | Full Stack Developer

Feb '16 – Dec '19 | India

Transitioned towards full stack development with improving my backend capability using Nodejs and Python. Successfully delivered numerous POC's for Wipro's internal projects. Reduced the delivery time for such POC's by leveraging the ease of using Nodejs framework and deployed on AWS's EC2 instance for better and faster accessibility. Highly skilled in delivering time framed projects for Dubai government, these projects were usually live for a period of 2-3 days for events like *GITEX, Dubai Expo, DIMS*. These small projects **increased revenue by 40% annually**. Working on such time framed projects, helped me to dive deeper into the Project Management aspects adopting agile methodologies.

Cuztomise Softech Pvt Ltd | Team Lead | Backend Developer

Jan '13 – Jan '16 | India

Started my development career with PHP, REST API's and helped build an innovative product "Cuztomise" which turned out to be a game changer for the company with over **\$5 million** annual turnovers. I was also part of that energetic backend team that provided API's for creating two mobile apps for a Norwegian based company. Working on such projects helped me to have a better grip over server-side scripting, building REST API's and designing database architecture.
