07/2018 – 04/2019  
Gandhinagar, India

### Oracle India Pvt Ltd, Senior Applications Engineer

**Product:** Oracle HCM Fusion Absence Management

**Technology:**

Core Java, ADF, Spring, Oracle DB, Hibernate

**Roles and Responsibilities:**

- Develop and maintain the software product functionally and technically
- Clear resolution of bugs and effective communication with customers
- Following best practices for deployment life cycle in different environments

**Project Description:**

Fusion HCM is basically an HRMS portal developed by Oracle in Java ADF technology. I worked in the absence management module, where we provided support and maintenance to millions of customers regarding absences management using java technology.

11/2017 – 06/2018  
Ahmedabad, India

### Measure One Solutions Pvt Ltd, Senior Systems Engineer

**Product:** M120 Dev Portal

**Technology:**

Angular 4, Java, Spring, Oracle DB, Hibernate, JSON, Git, Jenkins, HTML

**Roles and Responsibilities:**

- Optimal development and maintenance of the application from the back end and front end
- Proper communication with internal team members and customers

**Project Description:**

M120 Dev is a web portal related to the loan and transcript processing of all major schools and universities clients. The application provides an optimized score for all enrolled students. I worked in the backend development (using Spring Rest API) as well as front end interactive visualization (using Angular).

11/2014 – 11/2017  
Gandhinagar, India

### Tata Consultancy Services, Systems Engineer

**Project:** Supplier Connect

**Roles and Responsibilities:**

- Proper development of software application from the front end and back end
- Maintaining the database design and optimizing it

**Project Description:**

It is a web portal that handles all the supplier sensitive data who are engaged in supplying valuable goods to our client. We developed this application using advanced technologies and performed high-end calculations maintaining sensitive data of millions of suppliers in each transaction.

**Project 2:** TCT GE Application

**Roles and Responsibilities:**

- Proper development of software application from the front end and back end
- Communication with the client on a day to day basis

**Project Description:**

It is an integrated solution portal for all the businesses handled by our client (General Electric). We actually provided a basic platform for connecting different businesses in a single integrated manner. Here, I worked in developing interactive and friendly UI system using Angular and JavaScript technology.
